# Showers & Eyewash

Requirements specify that "... suitable facilities for quick drenching or flushing of the eyes and body shall be provided within the work area..."

Visit [www.osha.gov](http://www.osha.gov) for complete details and regulation requirements.

5135

## Portable Low-Profile Eyewash Station

One of the top OSHA citations is lacking an emergency eyewash station. As required by law, protect employees and guard against personal injury claims. Operates with one motion, one hand. Gravity fed 15-minute flow time. No plumbing required. Provides a minimum 15-minutes flushing period. Includes mounting bracket, inspection tag and preservative. Change water every 3-6 months. Measures 11 1/2" x 19 1/2" x 25". Meets ANSI Z358.1.

## Honeywell

### Personal Eyewashes and Wall Stations

Sealed, sterile bottles contain Eyesaline® – a buffered, saline solution superior to tap water for emergency eye care. Blow-fill-seal bottles are tamper-resistant, yet easily removed in an emergency. Extended flow opening provides longer flow rate than conventional bottles. Durable, open face design holds bottles firmly in place with easy access to bottles in an emergency. Mounts to wall with provided screws. Durable plastic is easy-to-clean. Simple, highly visible operating instructions are provided on each unit. Bottles feature trilingual instructions. Ensured quality and lasting value with FDA-grade polyethylene bottles featuring lot numbers and expiration dates. DOES NOT MEET the current ANSI Z358.1-2014 15-minute flushing requirement.

## Honeywell

### Fendall Porta Stream® I Eyewash Station

Portable, lightweight and delivers 6 minutes of uninterrupted, hands-free flushing without costly plumbing. Gravity-fed flow begins immediately when the nozzle pull strap is removed. Supplied with 70 oz. of Eyesaline® concentrate which, when mixed with tap water provides 6 gals. of saline solution. May be mounted on a wall, mobile cart or mobile stand for easy and affordable safety near most workplace hazards. Nozzle strap is easily removed, leaving hands free to hold eyelids open. Large fill hole simplifies refilling and cleaning. Illustrated operating instructions printed on the unit. Suitable for nuisance situations such as dust or particle flushing where a 15-minute flushing device is not a requirement. Hi-viz green.

### Fendall Porta Stream® II Eyewash Station

Portable, self-contained design may be mounted on a wall or mobile cart. Nozzle strap is easily removed to activate flushing, leaving hands free to hold eyelids open. Molded handle accepts hanging bracket for vertical or horizontal surface installation. Supplied with Eyesaline® concentrate; when mixed provides 14-16 gals. of preserved, buffered saline solution. Industry-compliant 15-minute flow cycle from a large 16-gal. reservoir permits thorough eye flushing by providing a 0.4 gpm flow rate over the eyes. Large fill hole with lockable fill cap simplifies refilling and cleaning and reduces risk of possible tampering. Includes Emergency Eyewash sign. Meets ANSI Z358.1-2014 15-minute flushing requirements for primary eyewash stations. Hi-viz green.

32-000454-0000

**Honeywell****Eyesaline® Personal Eyewashes**

Bottles contain Eyesaline saline solution for use in personal eyewash devices that offer secondary response and are intended to supplement, not replace, primary eyewash units. Also used for continued irrigation when moving an injured person from a primary eyewash unit to medical care. Easy-open top is tamper-resistant, yet easily removed in an emergency. User-controlled volume delivers drops or an irrigating stream of solution, depending on the squeeze pressure applied to the bottle. Made of FDA-grade polyethylene with lot numbers and expiration dates to ensure quality. Three-year shelf life.

G1100

**G1100 EyeSafe™ and G1101 EyeSafe-X™  
Faucet-Mounted Eyewashes**

Features EyeSafe and EyeSafe-X mounts, easy installation and an unlimited supply of potable water for rinsing user's eyes. EyeSafe spray head outlets mount 3" apart to fit most faucets; EyeSafe-X large profile spray head outlets mount 5" apart to fit gooseneck faucets. Adjustable outlet heads deliver a soft, aerated flow of water. Includes forged brass diverter valve, inlet body with 55/64"-27 female thread and three adapters plus furnished outlet with removable aerator on bottom. Requires two motions to operate (turn on water, pull knob to activate eyewash flow). Intended solely as supplemental units for use with plumbed eyewash equipment already installed in the workplace. Should be used with cold or warm water only. Fully assembled and 100% tested.

## G1540 AquaGuard 16-Gal. Portable Eyewashes

Self-contained, 16-gal. gravity-flow eyewash unit uses gravity to deliver water through dual spray heads. Unit delivers over 8 gals. (30 liters) of water for 15 minutes, thus complying with the provisions of ANSI Z358.1-2014 for eyewashes. Rugged plastic tank can be installed in a wide variety of locations. Ideal for use where a continuous supply of potable water is not available, especially in remote plant areas and low traffic areas. Tank has built-in carrying handle, heavy wall construction and reinforced ribs to support weight of unit. Eyewash delivers over .5 gallons per minute for 15 minutes. Water flow is activated by pulling down on bright yellow eyewash tray. Integral full flow nozzles deliver soft spray of water. Swing tray up to storage position to stop flow. Can be wall-mounted or used on countertop. Heated, freeze-resistant unit also available.

## GFR3100 Heated Safety Station with Eyewash

Electric heat-traced station prevents freezing even in extreme conditions. Thermostat regulated unit heated by self-limiting heat-tracing cable wrapped around internal pipe. Intended for cold weather use down to -40° F. Features 10" dia. orange ABS plastic shower head with 20 gpm flow control. Supplies are: 1 1/4" NPT female top supply inlet; 1" IPS brass stay-open ball shower valve with stainless steel actuating arm and 29" stainless steel pull rod; and 1/2" IPS brass three-way self-draining stay-open ball eyewash valve with 1/2" NPT port to drain water from spray heads after use. Valves made in USA with brass ball and Teflon® seals. Galvanized steel pipe and fittings, UV-resistant, orange, ABS plastic jacket with polyethylene foam insulation, and freeze-resistant spray head assembly with float-off dust covers and internal flow control. Units approved for Class I, Division 2, Groups B, C, and D. Electrical components are FM, UL® and CSA approved.

## G1562 15-Gal. Portable Eyewash/Drench Hose Units

Self-contained eyewash/drench hose units ideal for use where a continuous supply of potable water is not available, especially in remote plant areas, and low traffic areas where installation of plumbed equipment is not cost-effective. 15-Gal. units provide approximately 10 usable gals. (37.9 liters) of water for effective rinsing of the eyes, face or body, for fifteen minutes, thus complying with the provisions of ANSI Z358.1-2014 for eyewashes. Stainless steel pressurized tank includes built-in carrying handles, air intake fitting, pressure gauge and pressure relief valve. Unit features (2) GS-Plus™ spray heads, each with a "flip top" dust cover, internal flow control and filter, and a 1/2" IPS chrome-plated, brass stay-open ball valve with flag handle. Pressure regulator controls eyewash flow to 0.65 GPM for 15 minutes. Drench hose features single GS-Plus spray head with "flip top" dust cover, internal flow control and filter; chrome-plated, brass squeeze valve with stainless steel lever handle and 6' reinforced PVC hose. Heated, freeze-resistant model also available.

♦ G1562HTR	B7311547	Portable eyewash/drench hose, heated	Ea	\$2,546.51

## G3600LF and G3800LF Tempering Valves

Blends hot and cold water by sensing incoming water temperature and automatically blending it to 85° F. High temperature limit stop is set to 90° F. Features dial thermometer on outlet to monitor temperature of delivered water. If hot water supply is restricted or fails, 20 gpm of cold water at 30 psi can be delivered. If cold water supply is lost, valve will close and not deliver water. 6-Gal. capacity valve has flow capacity of 2 to 6 gpm and can be used with eyewash, eye/face wash, dual purpose eyewash/drench hose and drench hose units. 44-Gal. capacity valve has flow capacity of 3 to 44 gpm and can be used with single installation of emergency showers and safety stations, and with multiple installations of emergency shower, eyewash, eye/face wash, dual purpose eyewash/drench hose, drench hose and safety station units.
